## Issues

Pro-Dosa BOOST is a comprehensive, balanced, bioavailable multi-nutrient paste for horses. It has been formulated to replace essential nutrients lost in training, competition, transport, or stress. Pro-Dosa BOOST is now used throughout New Zealand, Australia, Asia, and the Middle-East.

## CompactDry

CompactDry is a ready-to-use culture media for Food Microbiology. Its line-up is not only hygiene indicators but also pathogens.

CompactDry TC is validated under not only Human foods but also Pet food and Environmental sample.

CompactDry AQ is developed based on ISO6222;1999 Water quality-Enumeration of culturable micro-organism- Colony Count by inoculation in a nutrient agar culture medium

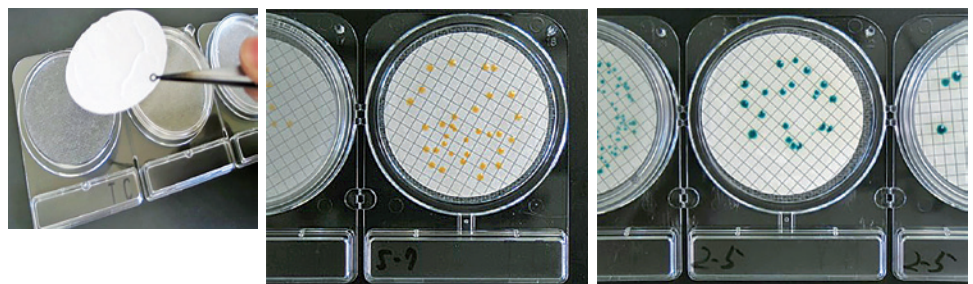

**MICROVAL**®  
NEN

## Applications

In the laboratory of Pro-Dosa, the method of "Membrane Filtration" is taken for Microbiology test on their products.

CompactDry is designed to match a size of a membrane 1/4 filter.

CompactDry contributes to improve the operation efficiency at Pro-Dosa's laboratory.
