

CompactDry × Citrus Fruits

Customers

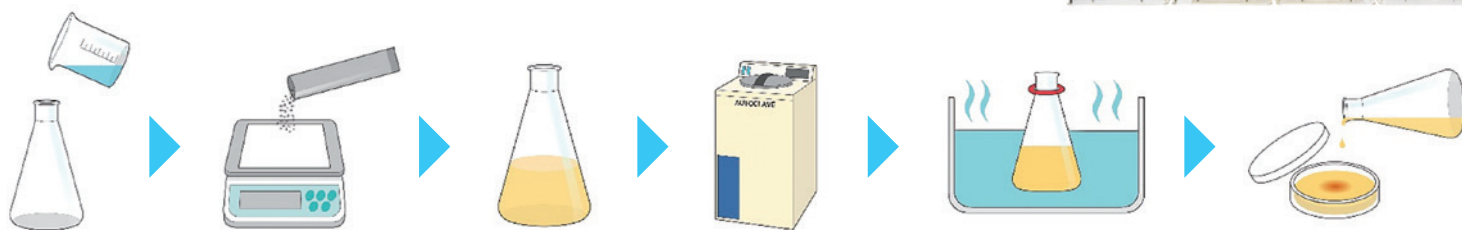

A Mexican Juice Company

The customer, who is a global agro-provider, exports the citrus and tropical fruits' products all over the world. The quality is controlled according to the global food safety system- FSSC22000, and the microbiology test is strictly carried out, too. A QC laboratory now utilizes a rapid culture media for screening the Aerobic Bacteria Count on their citrus and fruits' products.

CompactDry

CompactDry is a Ready to use culture media for the food microbiology. You can save time of the following media preparations once applying the CompactDry.

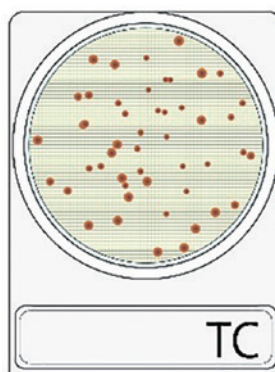

PROCEDURES OF MEDIA PREPARATIONS

Applications

Laboratory staff is now using CompactDry Aerobic Bacteria Count in the daily microbiology tests.

The characteristics of CompactDry are not only saving the time but also being validated internationally.

That helps a lot for exporting the products
