

# CompactDry × Spices

## Customers

### The world's largest producer of value added spices Kerala, India

These powdered and sterilised spices conform to the stringent European Commission directives for microbial load, pesticide residues, aflatoxin and other contaminants.

The quality is strictly controlled by the global food safety standards/systems such as FSSC 22000, ISO/IEC 17025:2005, HACCP.

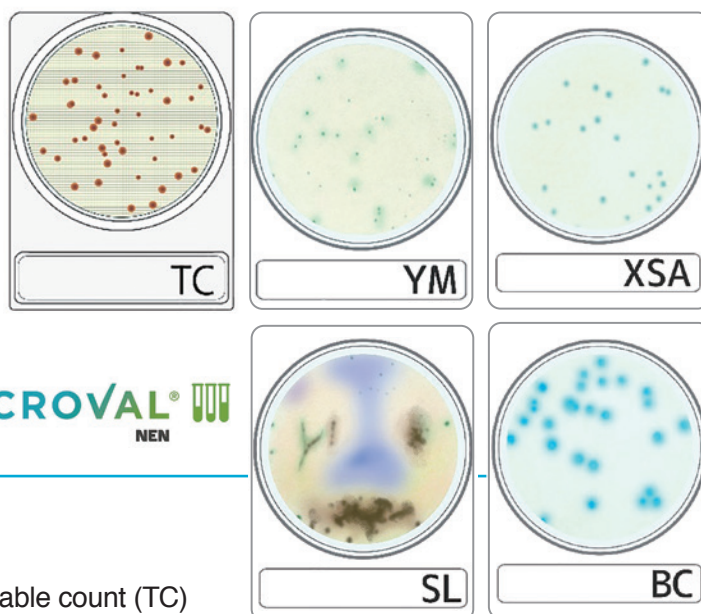

## CompactDry

In general, there are several kinds of bacteria to be microbiologically tested for the spice products;

- Total viable count,
- Yeast & Moulds,
- Coagulase positive staphylococci,
- Salmonella spp,
- Bacillus cereus.

CompactDry is the ready-to-use-media that all of the bacteria are lined-up.

MICROVAL<sup>®</sup> NEN

## Applications

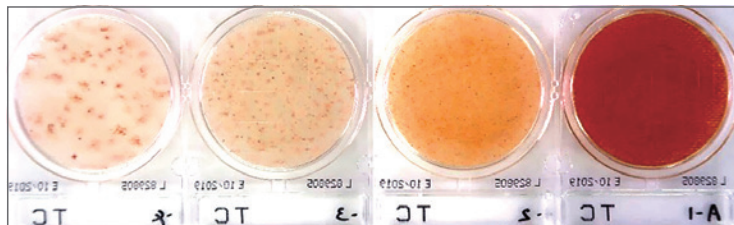

A QC department at the customer utilizes CompactDry, Total viable count (TC) and Yeast & Moulds (YM), to improve the operation efficiency of microbiology tests on the spice products.

CompactDry Series are certified by "MicroVal" that is ISO16140-2, Protocol for the validation of alternative (proprietary) methods against a reference method.

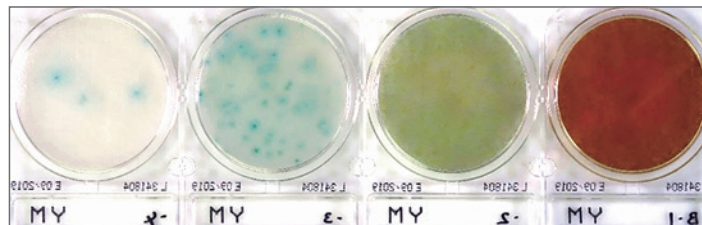

CompactDry validated by "MicroVal" suits a microbiology testing lab. having the food safety system on a basis on ISO

Colonies on the plates become clear to see from the dilutions at x1,000 since the spices color is strong.

Total viable count;

Yeast & Moulds;
